

A Message from Scott Hyde

Hi again everyone! As usual, I just want to take a moment to say hello and thank you, as well as provide you with updates about us and our business by way of this newsletter. I hope you find this informative and entertaining!

On the home front our family is doing very well. Most of you know we have four children: Samuel (8), Jonny (5), Nico (3), and Audrey (1.5). Sam and Jonny have continued with winter baseball clinics that are winding down now as spring season is about to start for both of them. As if I was not busy enough already, I've been asked to be an assistant coach for Sam's team this spring. That should be interesting! All three boys have also been doing swimming lessons and seem to really enjoy that. School is going well also for Sam (grade 2) and Jonny (kindergarten). Finally regarding Audrey - she finally started walking about a month ago, so she was a little late to the party, but now it's as if she's been walking her entire life. Look out world!

As far as the business is concerned, what can I say but wow! Things have really been going well for the past several

months - we are busier than ever! This presents welcome challenges, so we are adapting to the new reality. As such, some may know that we have decided to open 2 Saturdays each month (by appointment only). Also, we have also been training two new students in our Langley office a few hours each week - Jennifer and Ted. These students require a certain amount of practicum hours to graduate as a hearing aid practitioner, so we've offered to help them with that.

Doug (Dad) is doing very well and is a fully licensed hearing aid practitioner, working mainly in the Abbotsford office. Lavina is handling the front desk duties in Langley and Faith is doing the same in Abbotsford. We are thankful for both of them! Last but not least, Sue continues to help out behind the scenes wherever there's a need.

Finally, I'd like to say thank you to you. We couldn't do this without you and we truly appreciate your business.

From the bottom of my heart -

Thank You!

Is your Hearing Aid Battery dead?

Ever wonder if your hearing aid battery is dead? Several weeks ago a client showed me a really neat trick to find out. Here's what you do:

Hold the hearing aid battery about six to eight inches above a hard and flat surface, like your kitchen table, countertop or your desk and simply drop the battery. If it bounces around like a jumping bean it is out of juice, if it just kind of goes thud and doesn't bounce, it's fresh! Simple as that.

I did a quick video on our YouTube channel demonstrating this, so check it out if you like at this link:
